INDEX TO VOLUME 141

Alphabetical Table of Contents of Authors

ABRAMS, PETER A. Effect of increased productivity on the abundances of trophic levels, 351

ADLER, FREDERICK R. Migration alone can produce persistence of host-parasitoid models, 642

ÅGREN, JON, and DOUGLAS W. SCHEMSKE. The cost of defense against herbivores: an experimental study of trichome production in *Brassica rapa*, 338

ALFORD, ROSS A., and GEORGE D. JACKSON. Do cephalopods and larvae of other taxa grow asymptotically? 717

ALLEN, GERALDINE A., and JOSEPH A. ANTOS. Sex ratio variation in the dioecious shrub *Oemleria cerasiformis*, 537

ANDERSON, SCOTT K. See JULIE L. LOCKWOOD

ANTOS, JOSEPH A. See GERALDINE A. ALLEN

AYAL, YORAM, and RICHARD F. GREEN. Optimal egg distribution among host patches for parasitoids subject to attack by hyperparasitoids, 120

BAKER, ALLAN J. See ALEJANDRO LYNCH

BARROWCLOUGH, GEORGE F., and ROBERT F. ROCKWELL. Variance of lifetime reproductive success: estimation based on demographic data, 281

BOONSTRA, R. See A. R. E. SINCLAIR

BORGIA, GERALD. The cost of display in the non-resource-based mating system of the satin bowerbird, 729

BOUTIN, S. See A. R. E. SINCLAIR

BOYCE, MARK S. See LILY W. LIOU

BRIGGS, CHERYL J. Competition among parasitoid species on a stage-structured host and its effect on host suppression, 372

BROOKS, DANIEL R. See DEBORAH A. MCLENNAN

CHARLESWORTH, D. Why are unisexual flowers associated with wind pollination and unspecialized pollinators? 481

CIPOLLINI, MARTIN L., and EDMUND W. STILES. Fungi as biotic defense agents of fleshy fruits: alternative hypotheses, predictions, and evidence, 663

CORNELL, HOWARD V., and BRADFORD A. HAWKINS. Accumulation of native parasitoid species on introduced herbivores: a comparison of hosts as natives and hosts as invaders, 847

COSTA, DANIEL P. See MARIA B. KRETZMANN

CREEL, SCOTT, DAVID E. WILDT, and STEVEN L. MONFORT. Aggression, reproduction, and androgens in wild dwarf mongooses: a test of the challenge hypothesis, 816

DALE, M. See A. R. E. SINCLAIR

EDWARDS, SCOTT V., and SHAHID NAEEM. The phylogenetic component of cooperative breeding in perching birds, 754

ENGEN, STEINAR. See NIGEL G. YOCCOZ

FELDMAN, MARCUS W. See SARAH PERIN OTTO

FLOATE, KEVIN D., and THOMAS G. WHITHAM. The "hybrid bridge" hypothesis: host shifting via plant hybrid swarms, 651

GAYLEY, TODD. Genetics of kin selection: the role of behavioral inclusive fitness, 928

GETTY, THOMAS. Search tactics and frequency-dependent prey detection, 804

GOSLINE, J. M. See A. R. E. SINCLAIR

GOWATY, PATRICIA ADAIR. Differential dispersal, local resource competition, and sex ratio variation in birds, 263

GREEN, RICHARD F. See YORAM AYAL

HARTE, JOHN, and ANN P. KINZIG. Mutualism and competition between plants and decomposers: implications for nutrient allocation in ecosystems, 829
HAWKINS, BRADFORD A. Parasitoid species richness, host mortality, and biological control, 634
———. See HOWARD V. CORNELL
HEDRICK, PHILIP W. Sex-dependent habitat selection and genetic polymorphism, 491
HESS, HELEN C. The evolution of parental care in brooding spirorbid polychaetes: the effect of scaling constraints, 577
HOLDSWORTH, G. See A. R. E. SINCLAIR
HOUDE, ANNE E. Evolution by sexual selection: what can population comparisons tell us? 796

JACKSON, GEORGE D. See ROSS A. ALFORD

KINZIG, ANN P. See JOHN HARTE
KNAPP, A. K. See T. R. SEASTEDT
KREBS, C. J. See A. R. E. SINCLAIR
KRETZMANN, MARIA B., DANIEL P. COSTA, and BURNEY J. LE BOEUF. Maternal energy investment in elephant seal pups: evidence for sexual equality? 466

LAWLER, SHARON P., and PETER J. MORIN. Food web architecture and population dynamics in laboratory microcosms of protists, 675
LAWRENCE, W. S. Resouce and pollen limitation: plant size-dependent reproductive patterns in *Physalis longifolia*, 296
LE BOEUF, BURNEY J. See MARIA B. KRETZMANN
LEVITAN, DON R. The importance of sperm limitation to the evolution of egg size in marine invertebrates, 517
LIOU, LILY W., TREVOR PRICE, MARK S. BOYCE, and CHRISTOPHER M. PERRINS. Fluctuating environments and clutch size evolution in great tits, 507
LOCKWOOD, JULIE L., MICHAEL P. MOULTON, and SCOTT K. ANDERSON. Morphological assortment and the assembly of communities of introduced passeriforms on oceanic islands: Tahiti versus Oahu, 398
LONG, MICHAEL J. See MARK REES
LYNCH, ALEJANDRO, and ALLAN J. BAKER. A population memetics approach to cultural evolution in chaffinch song: meme diversity within populations, 597

MADSEN, THOMAS, and RICHARD SHINE. Temporal variability in sexual selection acting on reproductive tactics and body size in male snakes, 167
MAESTRIPIERI, DARIO. Vigilance costs of allogrooming in macaque mothers, 744
MARTIN, THOMAS E. Nest predation among vegetation layers and habitat types: revising the dogmas, 897
MCCAULEY, EDWARD. Internal versus external causes of dynamics in a freshwater plant-herbivore system, 428
MCLENNAN, DEBORAH A., and DANIEL R. BROOKS. The phylogenetic component of cooperative breeding in perching birds: a commentary, 790
MØLLER, ANDERS P. See BIRGITTA SILLÉN-TULLBERG
MONFORT, STEVEN L. See SCOTT CREEL
MORIN, PETER J. See SHARON P. LAWLER
MOULTON, MICHAEL P. The all-or-none pattern in introduced Hawaiian passeriforms: the role of competition sustained, 105
———. See JULIE L. LOCKWOOD

NAEEM, SHAHID. See SCOTT V. EDWARDS
NILSSON, JAN-ÅKE. Energetic constraints on hatching asynchrony, 158

OTTO, SARAH PERIN, CLAY SASSAMAN, and MARCUS W. FELDMAN. Evolution of sex determination in the conchostracan shrimp *Eulimnadia texana*, 329

PACALA, STEPHEN W. See HEATHER L. REYNOLDS
PERRINS, CHRISTOPHER M. See LILY W. LIOU
PRICE, TREVOR. See LILY W. LIOU

REAL, LESLIE A. Erratum: time discounting and floral choice in bees, 826
REES, MARK. Null models and disperal distributions: a comment on an article by Caley, 812
REES, MARK, and MICHAEL J. LONG. The analysis and interpretation of seedling recruitment curves, 233
REYNOLDS, HEATHER L., and STEPHEN W.

PACALA. An analytical treatment of root-to-shoot ratio and plant competition for soil nutrient and light, 51
REYNOLDS, JOHN D. Should attractive individuals court more? theory and a test, 914
ROCKWELL, ROBERT F. See GEORGE F. BARROWCLOUGH
ROSENHEIM, JAY A. Single-sex broods and the evolution of nonsiblicidal parasitoid wasps, 90
ROSS, KENNETH G. The breeding system of the fire ant *Solenopsis invicta:* effects on colony genetic structure, 554

SALONIEMI, IRMA. A coevolutionary predator-prey model with quantitative characters, 880
SASSAMAN, CLAY, and STEPHEN C. WEEKS. The genetic mechanism of sex determination in the conchostracan shrimp *Eulimnadia texana,* 314
———. See SARAH PERIN OTTO
SCHEMSKE, DOUGLAS W. See JON ÅGREN
SEASTEDT, T. R., and A. K. KNAPP. Consequences of nonequilibrium resource availability across multiple time scales: the transient maxima hypothesis, 621
SHINE, RICHARD. See THOMAS MADSEN
SILLÉN-TULLBERG, BIRGITTA, and ANDERS P. MØLLER. The relationship between concealed ovulation and mating systems in anthropoid primates: a phylogenetic analysis, 1
SINCLAIR, A. R. E., J. M. GOSLINE, G. HOLDSWORTH, C. J. KREBS, S. BOUTIN, J. N. M. SMITH, R. BOONSTRA, and M. DALE. Can the solar cycle and climate synchronize the snowshoe hare cycle in Canada? evidence from tree rings and ice cores, 173
SMITH, J. N. M. See A. R. E. SINCLAIR
SNYDER, MARC A. Interactions between Abert's squirrel and ponderosa pine: the relationship between selective herbivory and host plant fitness, 866
STENSETH, NILS CHR. See NIGEL G. YOCCOZ
STILES, EDMUND W. See MARTIN L. CIPOLLINI

TAYLOR, ANDREW D. Aggregation, competition, and host-parasitoid dynamics: stability conditions don't tell it all, 501

VAIL, STEPHEN G. Scale-dependent responses to resource spatial pattern in simple models of consumer movement, 199
VANDERMEER, JOHN. Loose coupling of predator-prey cycles: entrainment, chaos, and intermittency in the classic MacArthur consumer-resource equations, 687
VANDER WALL, STEPHEN B. A model of caching depth: implications for scatter hoarders and plant dispersal, 217

WALTON, B. MICHAEL. Physiology and phylogeny: the evolution of locomotor energetics in hylid frogs, 26
WATSON, PAUL J. Foraging advantage of polyandry for female sierra dome spiders (*Linyphia litigiosa:* Linyphiidae) and assessment of alternative direct benefit hypotheses, 440
WEEKS, STEPHEN C. See CLAY SASSAMAN
———. The effects of recurrent clonal formation on clonal invasion patterns and sexual persistence: a Monte Carlo simulation of the frozen niche-variation model, 409
WHITHAM, THOMAS G. See KEVIN D. FLOATE
WILDT, DAVID E. See SCOTT CREEL
WOOTTON, J. TIMOTHY. Indirect effects and habitat use in an intertidal community: interaction chains and interaction modifications, 71

YOCCOZ, NIGEL G., STEINAR ENGEN, and NILS CHR. STENSETH. Optimal foraging: the importance of environmental stochasticity and accuracy in parameter estimation, 139

Alphabetical Table of Contents of Titles

Accumulation of native parasitoid species on introduced herbivores: a comparison of hosts as natives and hosts as invaders. Howard V. Cornell and Bradford A. Hawkins, 847
Aggregation, competition, and host-

parasitoid dynamics: stability conditions don't tell it all. Andrew D. Taylor, 501

Aggression, reproduction, and androgens in wild dwarf mongooses: a test of the challenge hypothesis. Scott Creel, David E. Wildt, and Steven L. Monfort, 816

The all-or-none pattern in introduced Hawaiian passeriforms: the role of competition sustained. Michael P. Moulton, 105

The analysis and interpretation of seedling recruitment curves. Mark Rees and Michael J. Long, 233

An analytical treatment of root-to-shoot ratio and plant competition for soil nutrient and light. Heather L. Reynolds and Stephen W. Pacala, 51

The breeding system of the fire ant *Solenopsis invicta:* effects on colony genetic structure. Kenneth G. Ross, 554

Can the solar cycle and climate synchronize the snowshoe hare cycle in Canada? evidence from tree rings and ice cores. A. R. E. Sinclair, J. M. Gosline, G. Holdsworth, C. J. Krebs, S. Boutin, J. N. M. Smith, R. Boonstra, and M. Dale, 173

A coevolutionary predator-prey model with quantitative characters. Irma Saloniemi, 880

Competition among parasitoid species on a stage-structured host and its effect on host suppression. Cheryl J. Briggs, 372

Consequences of nonequilibrium resource availability across multiple time scales: the transient maxima hypothesis. T. R. Seastedt and A. K. Knapp, 621

The cost of defense against herbivores: an experimental study of trichome production in *Brassica rapa*. Jon Ågren and Douglas W. Schemske, 338

The cost of display in the non-resource-based mating system of the satin bowerbird. Gerald Borgia, 729

Differential dispersal, local resource competition, and sex ratio variation in birds. Patricia Adair Gowaty, 263

Do cephalopods and larvae of other taxa grow asymptotically? Ross A. Alford and George D. Jackson, 717

Effect of increased productivity on the abundances of trophic levels. Peter A. Abrams, 351

The effects of recurrent clonal formation on clonal invasion patterns and sexual persistence: a Monte Carlo simulation of the frozen niche-variation model. Stephen C. Weeks, 409

Energetic constraints on hatching asynchrony. Jan-Åke Nilsson, 158

Erratum: time discounting and floral choice in bees. Leslie A. Real, 826

Erratum: Young Investigators' Prizes, 954

Evolution by sexual selection: what can population comparisons tell us? Anne E. Houde, 796

The evolution of parental care in brooding spirorbid polychaetes: the effect of scaling constraints. Helen C. Hess, 577

Evolution of sex determination in the conchostracan shrimp *Eulimnadia texana*. Sarah Perin Otto, Clay Sassaman, and Marcus W. Feldman, 329

Fluctuating environments and clutch size evolution in great tits. Lily W. Liou, Trevor Price, Mark S. Boyce, and Christopher M. Perrins, 507

Food web architecture and population dynamics in laboratory microcosms of protists. Sharon P. Lawler and Peter J. Morin, 675

Foraging advantage of polyandry for female sierra dome spiders (*Linyphia litigiosa:* Linyphiidae) and assessment of alternative direct benefit hypotheses. Paul J. Watson, 440

Fungi as biotic defense agents of fleshy fruits: alternative hypotheses, predictions, and evidence. Martin L. Cipollini and Edmund W. Stiles, 663

The genetic mechanism of sex determination in the conchostracan shrimp *Eulimnadia texana*. Clay Sassaman and Stephen C. Weeks, 314

Genetics of kin selection: the role of behavioral inclusive fitness. Todd Gayley, 928

The "hybrid bridge" hypothesis: host shifting via plant hybrid swarms. Kevin D. Floate and Thomas G. Whitham, 651

The importance of sperm limitation to the evolution of egg size in marine invertebrates. Don R. Levitan, 517

Indirect effects and habitat use in an intertidal community: interaction chains and interaction modifications. J. Timothy Wootton, 71

Interactions between Abert's squirrel and ponderosa pine: the relationship between selective herbivory and host plant fitness. Marc A. Snyder, 866

Internal versus external causes of dynamics in a freshwater plant-herbivore system. Edward McCauley, 428

Loose coupling of predator-prey cycles: entrainment, chaos, and intermittency in the classic MacArthur consumer-resource equations. John Vandermeer, 687

Maternal energy investment in elephant seal pups: evidence for sexual equality? Maria B. Kretzmann, Daniel P. Costa, and Burney J. Le Boeuf, 466

Migration alone can produce persistence of host-parasitoid models. Frederick R. Adler, 642

A model of caching depth: implications for scatter hoarders and plant dispersal. Stephen B. Vander Wall, 217

Morphological assortment and the assembly of communities of introduced passeriforms on oceanic islands: Tahiti versus Oahu. Julie L. Lockwood, Michael P. Moulton, and Scott K. Anderson, 398

Mutualism and competition between plants and decomposers: implications for nutrient allocation in ecosystems. John Harte and Ann P. Kinzig, 829

Nest predation among vegetation layers and habitat types: revising the dogmas. Thomas E. Martin, 897

Null models and dispersal distributions: a comment on an article by Caley. Mark Rees, 812

Optimal egg distribution among host patches for parasitoids subject to attack by hyperparasitoids. Yoram Ayal and Richard F. Green, 120

Optimal foraging: the importance of environmental stochasticity and accuracy in parameter estimation. Nigel G. Yoccoz, Steinar Engen, and Nils Chr. Stenseth, 139

Parasitoid species richness, host mortality, and biological control. Bradford A. Hawkins, 634

The phylogenetic component of cooperative breeding in perching birds. Scott V. Edwards and Shahid Naeem, 754

The phylogenetic component of cooperative breeding in perching birds: a commentary. Deborah A. McLennan and Daniel R. Brooks, 790

Physiology and phylogeny: the evolution of locomotor energetics in hylid frogs. B. Michael Walton, 26

A population memetics approach to cultural evolution in chaffinch song: meme diversity within populations. Alejandro Lynch and Allan J. Baker, 597

The relationship between concealed ovulation and mating systems in anthropoid primates: a phylogenetic analysis. Birgitta Sillén-Tullberg and Anders P. Møller, 1

Resource and pollen limitation: plant size-dependent reproductive patterns in *Physalis longifolia*. W. S. Lawrence, 296

Scale-dependent responses to resource spatial pattern in simple models of consumer movement. Stephen G. Vail, 199

Search tactics and frequency-dependent prey detection. Thomas Getty, 804

Sex-dependent habitat selection and genetic polymorphism. Philip W. Hedrick, 491

Sex ratio variation in the dioecious shrub *Oemleria cerasiformis*. Geraldine A. Allen and Joseph A. Antos, 537

Should attractive individuals court more? theory and a test. John D. Reynolds, 914

Single-sex broods and the evolution of nonsiblicidal parasitoid wasps. Jay A. Rosenheim, 90

Temporal variability in sexual selection acting on reproductive tactics and body size in male snakes. Thomas Madsen and Richard Shine, 167

Variance of lifetime reproductive success: estimation based on demographic data. George F. Barrowclough and Robert F. Rockwell, 281

Vigilance costs of allogrooming in macaque mothers. Dario Maestripieri, 744

Why are unisexual flowers associated with wind pollination and unspecialized pollinators? D. Charlesworth, 481

Alphabetical Table of Keywords

adaption, 754
age specificity, 233
aggregation, 501
aggression, 816
allocation, 51
allogrooming, 744
allometry, 577
altruism, 928
androdioecy, 314, 329
androgens, 816
anseriformes, 263
antelope bitterbrush, 217
anurans, 26, 717
aphids, 120
Araneae, 440
arrested succession, 51
assemblage size, 847

barnacles, 71
biological control, 372, 634
biotic defense, 663
bird song, 597
bowerbird, 729
Brassica rapa, 338
